

# DOCTORS: The Ultimate Surgeon

55 minutes x 8 episodes

After being employed for 12 years at a university hospital, surgeon Kosuke Sagara decides to move on and accepts a job at Dogami General Hospital. To his surprise, he finds that the doctors at the hospital are more concerned about themselves than their patients.

Right from the start, Sagara tells hospital director Tamaki Dogami to decide on his salary only after seeing him in action. Then something happens... He offends Suguru Moriyama, Tamaki's nephew and future successor, when he openly states his opinion during an operation Moriyama is conducting.

Sagara believes that being an honest person comes before being a doctor. And so when he sees doctors driving around in expensive cars and caring more about their stocks and their careers rather than their patients, he decides to do whatever he can to cut away the cancer that infects the hospital.

Sometimes clever, other times callous, Sagara uses all kinds of methods in an attempt to reform the hospital. This drama will make you wish there was a doctor, a leader, an adult just like him.
