

DOMINO DARE

FORMAT

Can you conquer 50,000 dominos in 7 days?

50,000 dominos.
One **entire** house.
Seven days.

Think you have the **nerves** to brave 7 days of setting up a 50,000 dominos course throughout a house?

Two contestants will have 7 days to set up a 50,000 domino course inside a house. They will also be required to **eat and sleep** inside that very same house, where one false step could mean starting all over again from the beginning. Partners losing their patience and fights breaking out over who was the cause of an accidental toppling are bound to surface.

The building tension will culminate in the final toppling on the last day: **every domino** must fall!
