

Busy lives mean fewer opportunities for communities to work together toward a specific goal.

But the **power of singing** can help **create unity!**

This program is about allowing members of a community a chance to join forces and win **US\$25,000!**

And they can do it by taking the Karaoke Challenge! Community members that are confident in their singing abilities will gather on a special stage to show off their singing talent.

Every community has their own set of problems, like:
...repairing the bell in the church tower / town square.
...fixing a school that suffered hurricane damage.
...securing water safe enough to drink by digging for wells.

Money to help deal with these kinds of communal problems can be attained simply by competing in and winning the Karaoke Challenge.

While any community can apply for the challenge, program staff will ultimately have final say over which applications to accept. When a challenge is approved, 2 famous hosts will be sent to the community to help get things started! The number of challengers is limited to a maximum of 100 people. There are no restrictions on age or gender; anyone can enter. And if just one of these challengers can score a perfect 100, the entire community will be granted US\$25,000.

Challengers will practice their best songs until the day of the competition. The Karaoke machine, equipped with an evaluation system, will score songs based on pitch, rhythm, and the strength of their voice.

Will there be a community out there that can hammer out a perfect score and win **US\$25,000?!!**
